# IMAGE TRACKING & RIGHTS ENFORCEMENT WITH BLOCKCHAIN AS A GLOBAL SOLUTION

# CONFUSUIONS ABOUT BLOCKCHAIN & CRYPTOS

### Blockchain

BLOCKCHAIN can be seen as "just" a kind of distributed database. The big difference is, that the stored data are immutable.

You can use blockchain technology without using smart contracts or crypto currency. (except transaction fee) Basically coded, "self-fullfilling" contracts for multible purposes.

**Smart Contrects** 

You can use smart contracts without using crypto currency. (except transaction fee)

### Crypto Currency/ Tokens

There are two kinds of crypto currencies/ tokens: Utility tokens for a certain purpose used within a platfrom and security tokens which can be compared to a regular currency.

Crypto currency is always based on a blockchain, however the user will not realize.

# DIFFERENT AREAS OF THE IMAGE INDUSTRY

# DIFFERENT AREAS OF THE IMAGE INDUSTRY

# GLOBAL COPYRIGHT REGISTER

# **PROOF OF OWNERSHIP**

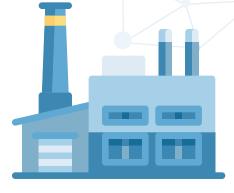

## Base of Civil Law in the World

### Proof of Ownership by Contract and Registry Entry

### **Commercial Register**

### gets validity through trust in the authorities by people

# **PROOF OF OWNERSHIP**

## Base of Civil Law in a Country

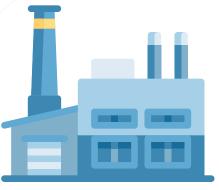

### Proof of Ownership by Contract and Registry Entry

Car Register

### Land Register

### **Commercial Register**

### gets validity through trust in the authorities by people

\* 17 Country (Albania, Argentina, Belarus, Brazil, Canada, China, France, India, Japan, Kenya, Mexico, Portugal, Russian Federation, Spain, Turkey, Ukraine, United States of America)

# TRUST

### Validity only through trust in the authorities

- Because the register is like a bunch of paper
- Can be manipulated by humans

## The authorities' proof:

 Proves the individual person claiming the property

Proves the subject a person claims

Register the subject but not secure

# **TRUST BY SECURITY**

### The Copyright Register Proof:

 Proves the individual person claiming the property

Proves the subject a person claims

Register the subject and secure by cryptographic methods

 Validity through transparency and cryptography

# WHATS DIFFERENT IN GLOBAL COPYRIGHT REGISTER

	GOVERNMENT REGISTRY	GLOBAL COPYRIGHT REGISTER
Proof of the Rightsowner	<b>O</b>	
Register the Subject		
Provide a Certificate		
Validity	Trust in Government	Cryptography
Globallyaccepted	×	
Security	×	Cryptography

# WHAT'S YOUR BENEFIT

**Global Coypright Register** will be available at

- Confirmed identity of author
- Blockchain secured and immutable registration of your image
- Certificate of ownership / authorship
- Certificate can be validated by third party people, such as lawyers or courts
- Transparent licensing history

# SEARCH MATCH LICENSE

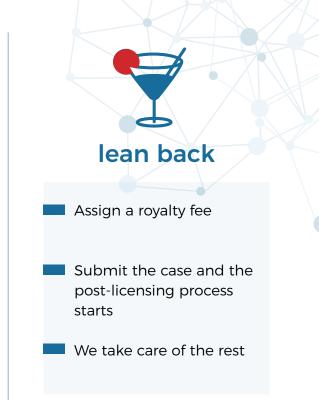

## **HOW IT WORKS**

### upload images

- Upload your images directly or via API
- Create collections and categories
- Search proceeds automatically and constantly

- Select hits Mark illegal images among the search results
- Filter already licensed pictures
- You can even whitelist whole domains or single hit

SMART EASY FAIR

# COPYTRACK GLOBAL COPYRIGHT ENFORCEMENT

# UNQUE TECHNOLOGY AND SERVICE

# **UNIQUE TECHNOLOGY**

### High performance web-crawler

Our high performance web-crawler searches millions of web-sites worldwide every day.

#### Automatic Rights Clearing Portal

COPYTRACK's "Rights Clearing Portal" allows the infringing party to view the case and evidence, to prove legal licensing or subsequently license the image including online payment.

### Automatic securing of evidence

COPYTRACK secures all relevant evidence automatically in order to ensure a successful enforcement.

### Automatic detection of use period

COPYTRACK detects automatically how long the image was used online.

### Automatic calculation of compensation

Based on a complex evaluation matrix, COPYTRACK automatically generates the compensation fee.

#### Unique image matching

Our unique image matching engine compares our customer's images with all findings. Cropping, changes and editing will be recognized and considered.

#### Automatic detection of infringing party

All images found online are automatically categorized per country including the infringing party's data. Sophisticated bots collect all necessary information from the targeted website.

#### Business API

We offer a free & easy possibility to integrate our services into your systems via our business API

### PCI Standard

COPYTRACK complies with the highest PCI security standards (bank-level)
