

SPORT SCHEMA 1.0

OPEN SPORTS DATA STANDARD FROM THE CREATORS OF SPORTSML

THE OPEN INDUSTRY STANDARD FOR SPORTS DATA THAT...

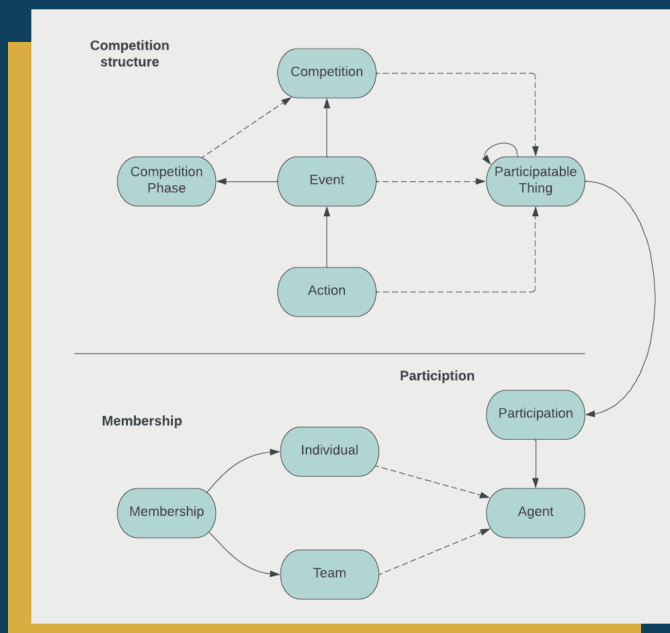

- Models every sport
- Integrates across data silos
- Is built on well-known data standards (RDF, SPARQL, SKOS, SHACL)
- Is format agnostic: XML, JSON, schema.org are all supported

MANAGED & MAINTAINED BY THE INTERNATIONAL PRESS TELECOMMUNICATIONS COUNCIL (IPTC)

DESCRIBE & IDENTIFY

- Play-by-play actions
- Schedules & tournament structures
- Career movements
- Results & statistical reports

SPORT SCHEMA 1.0

PROTECT AND FUTURE-PROOF YOUR DATA

- Build your platform around a single data schema
- Exchange data easily between internal systems and external partners
- Derive insights with flexible queries
- Integrate with standards-compliant knowledge-management systems
- Provide guidelines & labels for model training

BUILT ON REAL WORLD EXPERTISE

- Years of modelling experience by sports domain experts at large and specialist media firms
- Over 100 detailed vocabularies of sports statistics and play actions
- The expertise of the IPTC, the standards body of the news industry
- A bottom-up approach focused on real-world use cases
